KangooFix™

The KangooFix™ Neonatal Restraint System was developed to safely and effectively cradle and secure a newborn during ambulance transportation, allowing the baby between 3.5-11.1 lb (1.6-5 kg) to travel with their parent. Not only does this eliminate the need to use two vehicles and crews for transfers, but it also ensures a safer and improved environment for both parent and baby throughout the journey.

KangooFix™ **No. 0374906**
