

DEEP III BARRIER®

FIRE & RESCUE SERIES

MODEL NO. 1002

FEATURES KEYS & BENEFITS

Flexible TPR: Adds complete metacarpal protection and continuous coverage from knuckles to fingertips, including extensive web and thumb coverage.

SkidX Grip™: Adds oil, water and petrochemical resistance, as well as heightened grip control in wet, oily or dry environments.

Antimicrobial Barrier Lining: Porous, waterproof liner that keeps liquids out of the glove, while remaining breathable for hand comfort during use.

One-Piece Palm with Kevlar® Stitching: Adds abrasion resistance, durability and longevity in high-wear areas.

500D Spandex Wrist Closure: Ensures debris is kept out of glove, and reduces bacterial growth.

Passes ASTM F1670 / F1670M-17a: Testing for Penetration of Blood and Bodily Fluids

When safety, extrication, and search and rescue operations happen in wet or humid environments, having hand protection that combines cut and puncture resistance with a waterproof seal is essential.

The Deep III Barrier® gloves have a dexterous anti-slip SkidX Grip™ with cut and puncture resistance that is double stitched onto synthetic leather with Kevlar® thread. A breathable Hipora® barrier lines the inside of the gloves to create a waterproof seal that keeps hands dry in wet conditions. Flexible Thermoplastic Rubber (TPR) on back of fingers and hand adds continuous impact protection. The elasticized 500D Spandex long cuff secures glove around arm, keeping debris out and preventing bacterial growth.
